### 5 Star Review of *Magus Star Rising* by Ruffina Oserio for Readers' Favorite ~

“If you love well-written stories with three-dimensional characters and sophisticated plots, then *Magus Star Rising: A Tale of the Galactic Nexia* by Larry Ivkovich, a sci-fi novel will be a delightful treat. It’s a story that revolves around the mysterious Magus Star that will appear after many decades, an appearance to which the Senittes give great importance. When tech buff Simon Weller is offered a job to follow the husband of Claudia Honin-Zay, suspected of meeting another woman in the city of Yharrio, he thinks this could be an easy job. But Weller quickly finds himself embroiled in a very strange world. Now, he has to tread a very delicate path in a world where ancient rituals mixed with magic are practiced and where nothing is what it seems. In this world he has to face a very dangerous memory from his past. But there is a more terrifying threat, a mysterious killer who could be empowered by the Magus Star. And can Weller, with his allies, stop this dangerous killer?”

Larry Ivkovich is a great storyteller with a profound imagination that brings to life a world that is as fascinating as it is frightening, and characters that readers will enjoy, including Weller, an interstellar hospice, feline-humanoids, and a host of others. The writing is focused and there is a clear balance in the handling of the different elements of the story — a cunning plot, fleshed-out characters, and masterly thematic development. I enjoyed the fact that the author weaves elements of magic and mystery into the writing, creating a dark world that casts a spell on readers who enjoy the “noir” angle. Great writing for a spellbinding novel, utterly delectable!”
